

# How Aspen Power Delivered Title 24 Solar at No Cost

Aspen owns the solar system, shifting all the construction and installation costs from The Michaels Organization to Aspen.

- New construction in PG&E territory
- 210-unit apartment complex
- 320kw rooftop system
- \$750k in immediate additional benefits

**\$1.25M in avoided CapEx**

#### FLEXIBLE INSTALLATION OPTIONS

We offer flexibility in project execution. Aspen can manage the installation as a sub-contractor, or you can manage it.

#### PROVEN TRACK RECORD

For over a decade, Aspen's leadership has successfully partnered with general contractors using this strategy. Our experience ensures a reliable, successful path forward in solar.

#### WORKING WITH ASPEN POWER

With over 600 solar projects nationwide, we are committed to strong partnerships to deliver high-quality solar solutions:.

CHILES ROAD MULTIFAMILY

“Partnering with Aspen allowed us to meet Title 24 requirements as well as ESG goals, while also saving money on our development expenses. The value of our property increased substantially without any of the headaches or burdens of having to own or operate the systems ourselves.”

– The Michaels Organization

Let's build the clean energy future together.
