

# Unlocking Value for Developers in Challenging Situations

Aspen Power's acquired distressed assets demonstrating the value we bring to projects facing hurdles.

In May 2024, Aspen acquired an initial portfolio of 20 distressed community solar assets from a solar developer focused on salvaging the projects. This collaboration ensured that the developer received maximum compensation and that the projects in the portfolio would continue to advance to construction and commissioning.

## The Results

Aspen's involvement allowed the Illinois projects to progress under optimal conditions, securing economic benefits for local communities and advancing clean energy access.

## Why Partner with Aspen

We understand the pressure developers face to keep project COD on schedule. Aspen is ready to offer the resources, expertise, and financial stability needed to transform challenges into opportunities.

## What Aspen Power Brought to the Table

- **Expertise Across All Stages:** Whether early-stage or nearing COD, Aspen's end-to-end capabilities streamline project delivery.
- **Stabilizing Distressed Portfolios:** Our team navigates complex project challenges, ensuring timelines are met and value is preserved.
- **Financial Strength & Flexibility:** Aspen's backing enables rapid acquisition and execution of projects, providing peace of mind for developers.
- **Integrated Operations:** From financing to construction and management, we deliver holistic solutions that minimize headaches.

Let's power your success together.
